

CONTROLLER

Mid Coast Utility Company looking for a Controller. Attractive compensation package including medical and dental, paid vacation, sick and holidays as well as a 401k. This person would oversee all the financial areas of the business. This job requires a bachelor's degree, and a CPA is preferred.

The controller develops operating procedures of the Accounting Dept and supervises accounting personnel. They perform financial analysis of new business ventures. They will participate in development of fiscal policies and procedures, and develop income and expense budget objectives. The controller supervises monthly closing of the general ledger and prepares financial statements. They will develop and carry out guidelines for controls and internal auditing systems. The controller will establish and maintain accounting policies based on GAAP, FCC, and state PUC guidelines, and complete financial and regulatory reports for FCC, IRS, State PUC and others. They will negotiate with all interstate and intrastate carriers for settlements and billing and collection services, and will handle tax preparation and negotiation of company insurance.

Please send resume to employment@tidewater.net.
