

The MAGAZINE of MAINE

Down East

CONTROLLER

This hands-on position's primary responsibilities are the maintenance of automated financial systems, oversight of subsidiary ledger transactions, and the preparation of financial reports. The Controller will provide financial forecasting, modeling, and reporting and will monitor the company's financial position within established plans and goals.

The job requires an advanced knowledge of accounting and finance equivalent to a bachelor's degree and 5 to 10 years of related experience or equivalent combination of education with at least 2 years' experience as a Controller. Strong attention to detail and ability to work in a fast-paced and busy environment is important. Publishing experience and knowledge of the Microsoft Dynamics accounting system is preferred, but not required, for the right candidate. This position includes supervisory responsibilities.

For immediate consideration, please forward a cover letter, salary history, and résumé to:
